Project Name	<b>EduBold</b>	
Client	Apitized	
Role	Software Developer	
Roles performed	<ul style="list-style-type: none"> <li>➤ Developments</li> <li>➤ Enhancements.</li> <li>➤ Bug fixing.</li> <li>➤ Operation and Maintenance.</li> </ul>	
Technology used in project	Symfony2	MongoDB
	jQuery	
Description	<p>Edubold is cloud-based school management software that operates on the SaaS Model. The software is developed in Symfony2 using Mongo DB.</p> <p>The application covers the entire administrative processes being held in the school or college. It is an excellent way to systematically manage the schools and consists of modules for registration, admission, fee collection, examination, time table, transport, circular, library, payroll, accounts and inventory.</p> <p>The focus of this application is to automate the various processes and sub processes of the school. Also, it facilitates effective communication between the school and parents. Parent portal feature gives a platform to the parents to have complete visibility on the performance of the children. Management portal acts a complete MIS thereby providing all relevant reports.</p> <p>Url: <a href="http://www.edubold.com">http://www.edubold.com</a></p>	

Project Name	Real Estate	
Client		
Role	Senior Consultant	
Roles performed	<ul style="list-style-type: none"> <li>• Created Undershooting documents.</li> <li>• Estimated time lines.</li> <li>• Requirement gathering &amp; estimation</li> <li>• Development</li> <li>• Bug fixing</li> <li>• Client intraction</li> <li>• Source code maintained</li> </ul>	
Technology used in project	Symfony	Oracle 9i
	PHP
